

To: Superintendents of School and School Boards
From: Colleen Palmer, SPS Parent
Date: 12/31/2020

I, Colleen Palmer, parent of a 1st grade age TEC student, received an email with an offer that SPS would like to require "contact tracing" and "covid testing" for school. I would like to counter this offer regarding "contact tracing" and "covid testing":

Contact Tracing violates our privacy, Liberty, and autonomy, all of these must be secured and guaranteed prior to the implementation of this measure.

Covid Testing violates our bodily integrity, and is not proven to be an effective or accurate test for the disease called "covid-19". A "positive test" is not proven to be a "case of disease", nor does it prove contagion. "Asymptomatic carriers", previously known as healthy people, are not proven to spread covid-19.

Covid testing, as a requirement for entering school, will become appropriate only after:

1. The SarsCOV-2 virus is isolated, and is
2. Proven (scientifically, repeatedly and independently peer reviewed) to be contagious in human to human contact, and
3. A test is created that can
 - a. identify with 100% accuracy a contagious illness in a human, and
 - b. that does not violate the privacy and bodily integrity of the person.

Implementing contact tracing and covid testing without meeting these requirements would be harmful to me and my family.

I would like to further alert you to the slippery slope toward technocratic tyranny that you, the school board and superintendents of school, are heading down. For yourselves and families, you are welcome to do whatever you feel makes you safe, but your decisions as a superintendent or board member will affect the men, women, and children of Spokane Public Schools. Since mandating these unproven and unnecessary measures would violate our inalienable rights, they will cause harm to all people and the community at large.

Liberty is inalienable, safety (either perceived or real) is not. It is outside of your jurisdiction to mandate tests and tracing that would cause harm to others.

School is for learning, not medical intervention.

School is traditionally a place of learning, not of medical care, and these two areas of life must not be mixed. Never before have healthy people been required to undergo an invasive medical test in order to go about their normal lives, which includes going to school or to work. Health care is a protected and private matter governed by the parent or adult. It is inappropriate for any invasive medical testing to take place on school grounds or be required for school entry.

A wet swab of unknown origin placed deep in the nasal cavity and scraped against the blood brain barrier or the gathering of saliva and cheek cells containing DNA from inside the mouth IS invasive.

There is no data that provides evidence that healthy children are a danger to anyone, regardless of what the RT-PCR test result says. There is no evidence that testing reduces disease transmission. There is no evidence that asymptomatic spread happens.

Any measure that we take for public health must meet this criteria: *proven to benefit individual health and be free from side effects.* Contact tracing, covid testing and masking do not fit this criteria. Quite the opposite, it can be argued that they all cause harm.

I offer detailed and cited information below so that you may read for yourself some of the facts, data and philosophy that have helped me to formulate my opinion.

The loss of Liberty & Privacy.

Contact tracing violates privacy, and Liberty. It places, inappropriately, too much power in the hands of the unelected few. The implications of requiring tracing in order for people to live a normal life, such as to go to work or school, are far reaching and deeply alarming. If you do a little research on China and their contact tracing coupled with their social credit score you will begin to understand the slippery slope that rapidly leads to a dystopian, fascist technocracy, where an app powered by artificial intelligence (AI) tells you whether or not you may leave your house that day, based on "biometrics" or other social behaviors observed by AI. This technology already exists and is being used on humans today.

It is important to note that no test exists that can unequivocally determine whether or not someone is immune or contagious, and it is therefore a violation of natural rights to restrict the movement of free human beings based on a test.

The loss of human dignity and culture. Where are we heading?

In the past 8-9 months many human beings have been convinced of the necessity that we engage in inhumane behavior for our "safety". Without conclusive scientific evidence, we have collectively accepted that being near another healthy human is dangerous, that singers, trumpet players, and children are potential "super spreaders" of disease and that a face covering will "keep us and others safe".

Contrary to the success and survival of humans in all of history, and to the very nature of humanity as a social species, we have been convinced that we are "safer apart" and that is "social" to be distant. The concept of "safety" has superseded all of our previously revered cultural values. Visiting the elderly, comforting the sick, sitting with the dying, hugging our friends, group events that bring us joy and elevate our spirit are verboten. Why? Because we, in what was previously valued as the Land of Liberty, are no longer allowed to make our own decisions. Apparently, the majority are comfortable being dictated to. The state has taken on the role of parent and we must behave as compliant children, or else. We are informed, by the powers that shouldn't be, who tell us they are "experts", that this is the "new normal". A "new normal" that no human in their right mind (a mind free of fear panic) would agree to.

I suggest that the world we are rapidly creating, through our acquiescence to the fear narrative, is not at all what we wish for our future. Almost all humans, except a small percentage of psychopaths, wish for a human culture that values Liberty and the freedom to pursue our passions and creativity; a culture that respects and reveres our planet; a culture that promotes thriving, loving, supportive, communities; a culture that invests in human creativity and celebrates diversity of people and thought; a culture that stewards the planet so as to maintain an environment that will eliminate man-made disease; and a culture where sovereignty over our own lives and the lives of our children is honoured as an inalienable truth.

We are at a crossroads. Will we choose to allow technocratic control over every aspect of our lives by an unseen elite or AI algorithm, or will we reclaim our place of dominion, governance and stewardship over all the earth?

We must create what we wish by placing ourselves in the driver's seat, looking ahead, and navigating toward what we wish. Reclaiming our place requires us to take personal responsibility for our decisions and how our decisions are shaping the culture around us. In my view, we have been sold a lie of disease and scarcity which is counter to all of creation which exemplifies health, abundance and balance. These are the big picture concepts; the existential beliefs that, if we as human beings must contemplate if we are to continue to exist and begin to thrive in health, balance and sovereignty.

Who are we? What do we value? What future will we create? Who and what do we serve? This is our opportunity to rise, contemplate the whole, and create that which we wish to see. News of a "viral pandemic" is distracting us and the fear is crippling us. It is time to set aside fear and open our minds to the totality of our existence and discover what we are called to do at this pivotal moment in human history.

The pandemic: a tool for control through fear.

We are informed that we are in the midst of a "viral pandemic". Those who have told us they are "experts"; who have slithered their way into positions of power, such as Anthony Fauci and Bill Gates have failed to provide the scientific proof that the measures they promote are actually warranted. They have failed to openly debate with other experts who disagree with the measures they mandate.

The "news" promotes fear, without substance. They fail to report actual data about death rates (.26%), facts about the limitations of the covid test (not a diagnostic tool & accuracy changes according to number of cycles), facts about the placebo studies indicating that masks do not change rates of illness (danish study), facts that tens of thousands of epidemiologists, social scientists, public health experts and medical doctors worldwide do not agree that shutting the economy down and destroying small businesses, masking the healthy population, RT-PCR testing the healthy, and unregulated contact tracing is the way forward. No, the "news" is not performing its stated purpose: investigative reporting; rather it is propagating a narrative unsupported by facts and omitting essential information and facts from its programming. Why would doctors and other experts be excluded from the "news" if they, based on data, report that the measures we are taking are harmful and not supported by science? *Their messages are measured, and not steeped in fear.* Perhaps the "news" isn't aiming to investigate or report, but rather to steer the narrative toward fear to falsely necessitate draconian measures which will forever change society.

If that is their aim, inducing fear, they have certainly succeeded. The fear has become an effective tool to make previously rational human beings subservient and ready to upend their lives and values for the sake of "staying safe". People irrationally think that it will be over soon, or that an experimental vaccine that does not prevent spread of illness will automagically make everything go back to normal again. *Oh no, friends, if we do not put a stop to this ourselves, it will never end.* Life will become more restrictive, more divisive and more fearful.

During this pandemic, concepts that have never been in the consciousness are now accepted as truth. What was once known as a healthy person is now an "asymptomatic carrier", again an unscientific claim. Evidently, if you repeat a lie enough it becomes the "truth". As George Orwell described, we have accepted "double-speak" into our language, such as: "socially distant" and "together apart".

I hope that the sources and details that I have included in this letter will encourage you to think critically about the decisions you have made this year. Up until now you have chosen to acquiesce to the measures mandated or recommended by the Washington State Governor and health departments. It is likely that you have chosen to blindly follow the recommendations without a second thought, believing that all relevant information regarding Covid-19 was at your fingertips, and that the "health authority" had reached a consensus based on scientific evidence and therefore deserved your obedience. I hope it is clear after reading this letter, that dissenting voices are numerous and have been suppressed. The media has been grossly negligent during this "crisis".

There are far reaching implications to the decisions being made by you right now. It is imperative that people making decisions that affect the lives of thousands of people begin to utilize their own critical thinking skills and their intuition to inform their actions. We are at a critical moment and we must think broadly and make decisions with measured wisdom so that we may preserve our Humanity and the Liberty that we have evidently taken for granted.

Covid-19 is not proven to be a viral, contagious disease:

Contrary to the popular narrative's unproven claims that we are in the midst of a "contagious viral pandemic", the cause of the illness "Covid-19" has never been proven to be an infectious viral disease. This is not a conspiracy theory, it is fact.

In July 2020, the FDA posted a CDC document entitled "CDC 2019-Novel Coronavirus (2019-nCoV), Real-Time RT-PCR diagnostic Panel. For Emergency Use Only. Instructions for Use." <https://www.fda.gov/media/134922/download> Buried in the text, on page 42, is the following statement: "... no quantified virus isolates of the 2019-nCoV are currently available." Yes, you read that correctly: 2019-nCoV, also called "SarsCOV-2" has never been isolated.

The genetic material, often called viral fragments or in modern virology, exosomes, that have been associated with Covid-19 have never been proven to be able to cause disease. Firemen may be present at a fire, but would we suggest, without evidence, that they caused the fire?

If contagion has not been proven, you may wish to ask what is the purpose of the "covid test"? The RT-PCR (Reverse Transcriptase Polymerase Chain Reaction) test, also called the "covid test" was not invented to be a diagnostic tool for "covid". The RT-PCR test shows the presence of fragments of genetic material that were associated with the symptoms of illness we call "Covid-19", however these fragments of genetic material can also be present in healthy people. The presence of these genetic fragments do not indicate illness, nor do they indicate that a "positive case" is infectious.

This is very important to understand because we have been led to believe that a "positive" test means that one is "contagious" and has disease even though neither assumption has been proven to be true.

We have also been told that the genetic material associated with Covid-19 is "novel". Yet, the "novel coronavirus SarsCOV-2" has a 100% sequence match to 86 human chromosome fragments, as is searchable in BLAST, an internationally available genetic database. This evidence suggests that SarsCOV-2 is not at all "novel". These facts are concisely explained and scientifically referenced in this detailed article [covid19-evidence-of-global-fraud:](https://off-guardian.org/2020/11/17/covid19-evidence-of-global-fraud/)

<https://off-guardian.org/2020/11/17/covid19-evidence-of-global-fraud/>

I recognise that this information is difficult to digest and may cause a feeling of panic, rage, or an urgency to dismiss it outright. When our world view is shaken, it is truly upsetting. Opening our minds to these facts certainly does not induce warm and fuzzy feelings. It requires grit and resilience to take this information in. To be sure, there IS clear evidence of fraud and it is incumbent on you to look deeply and spend time with the information.

There is a powerful effort to censor and discredit those who share these facts. To be sure, we would like to believe that everything that is happening on the planet is legitimate and good, and that people "smarter than us" are taking good care of us. However, the evidence shows that the opposite is true. There are agenda playing out that have nothing to do with public health. The fear that has been foisted on the population has been drummed up intentionally to disable our rational abilities so we do not put together the larger picture of what is happening in our society and on the planet.

The Inaccuracy of the Covid Test:

As mentioned before, the covid test is looking for genetic fragments that have been associated with the illness "Covid-19"; fragments that have never been proven to be infectious or cause disease. This is not the only problem with the covid test. The RT-PCR test itself was never designed to be used as a diagnostic tool. <https://off-guardian.org/2020/11/17/covid19-evidence-of-global-fraud/> It is meant to identify RNA fragments but cannot diagnose disease.

Furthermore, the "accuracy" of the RT-PCR test is dependent on how many amplification cycles it goes through. This is well explained in this 7 minute talk by M.D. Tom Cowan: https://youtu.be/2mNhiNry8_Q. The number of cycles is not regulated and the more cycles that are used, the more "false positives" are found. <https://thehighwire.com/false-positive-covid-tests-will-extend-unjustified-lockdowns-fauci-admits-miniscule-accuracy/>

In light of these facts, we must be aware that "covid" testing healthy people could easily be abused in an effort to fictitiously count perfectly healthy people as "positive cases" in order to manufacture a "second wave", justifying soul crushing, deadly lock-downs, and more invasive, inhumane, technocratic "solutions".

To understand this landscape more clearly, I recommend an interview about the recent book "Corona False Alarm?" written by Prof. Sucharit Bhakdi PhD of Germany.

Interview: <https://youtu.be/ZnppBYgGARE>

Book:

<https://www.barnesandnoble.com/w/corona-false-alarm-karina-reiss-phd/1137565564>

I also recommend this interview titled "Planet Lockdown: with Catherine Austin Fitts, financial expert and manager of the Solari Report: <https://youtu.be/C1-0XKYAZU>

I must pose these questions:

- Who is watching how these tests are being used?
- Who is asking how many amplification cycles are being run?
- Who is asking why we are behaving as though this is a contagious disease, when viral contagion has not been proven?

Yes, we have been led to believe this is a deadly virus. We are naturally shocked when we learn that this hypothesis has not been proven. Stay with me, please. This is very important, will take some time to explore AND may be difficult to digest.

If this is the first you have encountered this information I recommend that you first take some time to read "Covid19 Evidence of Global Fraud" and deeply consider the evidence presented in the article.

<https://off-guardian.org/2020/11/17/covid19-evidence-of-global-fraud/>

We are a people capable of taking in information and coming to our own conclusions; we must think critically and be brave enough to explore content that challenges our current beliefs. *We must trust that our intelligence and intuition are worth utilizing and investing in.*

We must demand logic and proof from those who wish to impose restrictions on us.

We must ensure that every new policy has been thoroughly considered from different perspectives and expertise before we adopt them.

The Role of the Superintendents:

As a superintendent of schools, it is imperative that you consider the potential consequences of your acquiescence and enforcement of these arguably inappropriate policies.

If a child tests "positive" with this inherently problematic "covid test", are they going to be removed from their home if the home does not have more than one bathroom?

Is it going to be said that they, a perfectly healthy child, are a "danger to their parents"; that they might be an "asymptomatic carrier" of a "virus" that has never been proven to be contagious?

If they do test positive and are sick, since viral illness is an unproven hypothesis, it is possible they may be sick from an illness that is not contagious, such as glyphosate or microwave poisoning or nutrient deficiencies?

Do these innocent children who test positive with a meaningless test then get stripped from the care of their parents to become wards of the state based on a hypothesis?

When schools begin to blend themselves with or bend to the will of unelected health officials who overstep their role as advisor and take on role of "parent", "protector of the population", or "dictator" I see us heading down a slippery slope toward fascism.

Every man and woman is responsible for their own health and that of their children. Full stop. *It is not the role of government nor health agencies nor schools to dictate or mandate how individual families care for their own bodies.*

Healthy people, sharing space with others, have never been proven to be a danger to anyone. **Hypothesis, conjecture and fearmongering-hype do not create a rational basis for stripping human beings of our God given freedoms and liberties.** I offer that these "health officials" prove their claims with evidence presented in a court of law under oath. Until that happens it is incumbent upon us thinking human beings to choose not to participate in what is potentially a "covid" testing scam. This scam is fueling the fear-mongering fire,

manufacturing a "problem" thereby creating an excuse to usher in the technocratic take-over of our lives, all under the guise of "keeping us safe".

We still do currently live in a Democratic Republic that our forefathers had the intelligence to design so that we would be guarded against this kind of tyranny. Let us hope that we choose to keep the Liberties that we have long taken for granted. We cannot allow fear of an infectious disease to cause us to abandon our rational sense, our culture, our inalienable rights and our democratic ideals.

If you turn on the news, you might think the most important thing going on in the world is the "global pandemic". But this is the perfect distraction from what is going on in the shadows. In the background, unknown to most Americans, very powerful technocrats and globalists are ensuring that the narrative that suits their agenda is pushed forward while credible doctors, epidemiologists, journalists, and anyone who goes against the World Health Organization (WHO) are censored and slandered.

Facebook, Twitter, Instagram, Google and YouTube have made it their policy to censor Americans who share expertise and opinions that do not support the recommendations or policies of the WHO. I remind you that the WHO is not an American Organization. It is not run by any elected American citizen, but is funded by the billionaire computer scientist's foundation: "The Bill & Melinda Gates Foundation".

It is high time that those of you who are charged with decision making that affects thousands of children and their families start doing some investigating yourselves.

Start asking if those who purport to be "experts" really work on behalf of the people. Stop towing the line with unelected officials who are cherry picking "science" to suit their narrative. We must demand that the measures we are being mandated to endure align with evidence, and encompass the entire picture. You may be surprised to learn that so far, evidence is not driving our response.

What is Covid-19?

The illness we call "Covid-19" is very real, there are people who are developing serious symptoms such as thrombosis, hemoglobin issues resulting in lack of oxygen uptake similar to altitude sickness, blood clots, and cytokine storm to name a few. The CAUSE of this disease remains UNPROVEN. Infectious virus is one hypothesis.

There are other hypotheses as to the cause of the "Covid-19" disease. Here is a brief explanation of two that are both compelling and well supported:

1. Glyphosate (Bayer/Monsanto's "Round-Up") Poisoning from two sources:
 - a. Food intake of all U.S. non-organic wheat, beans, soy, corn, oats, sugar beets and more.
 - b. Air Pollution particulates that contain glyphosate due to the use of bio-fuels & ethanol from sources sprayed with glyphosate. All US automobile gasoline has 10% ethanol, some states such as New York State require heating oil to include biofuels.

Wuhan, China has some of the highest concentration of Glyphosate use and air pollution in the world. Glyphosate disrupts the building blocks of tissue and in the case of air exposure the damage is concentrated in the lung. For in-depth information about this hypothesis, see Dr. Stephanie Seneff of MIT's article on the Glyphosate Covid-19 Connection:

<https://stephanieseneff.net/glyphosate-covid-19-connection/>.

2. Microwave sickness due to microwave radiation poisoning from the recent rapid increase in radio frequency radiation exposure from "5G" which is a build out of new infrastructure and never before used frequencies.

5G nodes and towers are being deployed all around the world, even in Spokane, as "essential work" during the "pandemic". 5G is being put in hospitals, schools, outside bedroom windows on power poles and in the sky with Elon Musk's Spacelink Train which I witnessed fly over the Spokane area on Saturday 12/5/20, some 40+ "satellites". With what is being called "5G", new frequencies have been licensed and rolled out. The first city with thousands of 5G nodes in a dense area was Wuhan, China. These new radio-wave/microwave frequencies have never been used before on the planet AND have never been tested for safety. The symptoms of Covid-19 are similar to previously medically discovered "microwave radiation poisoning".

Apparently this truth is so dangerous that if social media influencers mention the possible connection of Covid-19 and 5G on YouTube they may get their account deleted without warning. There has been a relentless effort to label anyone a "conspiracy theorist" if they suggest that the 5G microwave radiation sickness may be connected to Covid-19 and should be investigated.

Arthur Firstenberg <https://www.cellphonetaskforce.org/>, American author and activist on the subject of electromagnetic radiation and health, has documented "flu pandemics" throughout history as being associated with the new waves of electrification of the earth, from telegraph - to electricity - to radio - to radar - to the present time, in his book "Invisible Rainbow" <https://www.amazon.com/Invisible-Rainbow-History-Electricity-Life/dp/1645020096>. During this pandemic, the flu of 1918 is frequently mentioned. Interestingly, this historically significant "flu pandemic" coincides with the installation of radio towers.

Medical Doctor, Tom Cowan <https://drtomcowan.com/>, has just co-published a book with Sally Fallon that is now banned on Amazon, called "Contagion Myth: Why Viruses, Including "Coronavirus" Are Not the Cause of Disease . Their book challenges the prevailing germ theory and offers a completely different hypothesis as to what is causing the disease we call "Covid-19".

In my view, this is a must read book. It is apparently so dangerous to Big Pharma, Bit Tech, Big Media and Big Ag that it has been censored (yes virtual book burning is very real) and hit pieces have been written about Dr. Cowan slandering and discrediting him. I recommend you get to know his work and trust your gut. In my view, this is a highly intelligent, moral, deeply spiritual MD.

<https://www.barnesandnoble.com/w/contagion-myth-thomas-s-cowan-md/1137427415?ean=9781510764620>

If germ theory is exposed to be false or even grossly incomplete, and the recognition that the nourished, toxin-free terrain of the body is what maintains health, it will be the end of Pharma, their Vaccine Cash Cow, and Allopathic Medicine as we know them. The ripple effect of their collapse will be felt by every behemoth industry from Big Tech to Big Agriculture and their sister chemical companies producing the toxic chemicals that are poisoning life on our planet.

The awakening of the population to the lies told, poisons created and harm done by these sycophantic, poisonous industries will necessitate their regulation, break up, or total destruction. These sycophantic, poisonous industries are predictably doing everything they can with their influential, moneyed, media controlling, power to steer the narrative. Both Sally Fallon and Dr. Cowan respond to all attacks that have been made against them offering concise rebuttal to the "fact-checkers" and "news articles" that aim to make all of us look away for fear that we too might be accused of being a "conspiracy theorist":

<https://nourishingtraditions.com/the-contagion-fairy-tale-by-thomas-cowan-md-and-sally-fallon-morell/>.

It has long been known, since before humans learned to harness electricity for power, that biological life is affected by electromagnetic frequencies (EMF). There are tens of thousands of studies in recent times that prove that radiofrequency can cause biological harm and yet this information remains suppressed. <https://ehtrust.org/science/>

Information is so suppressed, in fact, that Spokane Schools have passed out WiFi only chrome-books to children as if they are perfectly harmless, when it is scientifically known that WiFi negatively affects children's health.

<https://ehtrust.org/peer-reviewed-research-studies-on-wi-fi/>

Had this scientifically proven, widely available information been properly circulated by our health departments, schools would be providing families with a \$10 adapter that would allow children to connect to the router via a \$5 Ethernet cord allowing them to disable the WiFi and connect to the internet with a wire. Children are being exposed unnecessarily to harmful, carcinogenic WiFi and other wireless frequencies every day, at increasing rates at home, in schools, in Spokane city parks and their neighborhoods.

<https://ehtrust.org/amid-5g-concerns-the-us-and-europe-need-safer-technology-for-children/>
<http://spokanewired.org/noticeofalert.html>

You may be wondering, at this point, why you have never heard of these things before? Or if you have, you may wonder why, when you do hear of them, the label "conspiracy theory" is attached to it. I will allow you to utilize your own critical thinking skills to sort that out for yourself. You may wish to investigate the work of the "Godfather of PR", Edward Bernays, who employed covert ways of swaying public opinion.

Dissenting views about the Covid-19 response:

Among those professionals who do believe that Covid-19 is likely a viral disease and likely contagious, there are tens of thousands of these medical professionals worldwide who are speaking out, writing books and articles, publishing studies, AND are being censored and shadow banned by Big Media and Big Tech BECAUSE they are deeply critical of the falsely induced panic and economic and societal shut down. These tens of thousands of experts advocate for a much more measured approach and are accounting for the deadly results of continued panic, lock-downs, and restrictions. The heavily censored and slandered Great Barrington Declaration offers a more measured approach.

<https://spectator.us/great-barrington-declaration/>

<https://gbdeclaration.org/>

Also offering a more measured approach was Dr. Scott Atlas, health public policy expert, who was part of the coronavirus task force, and who has also been inappropriately drug through the coals by the "news" media.

<https://youtu.be/vpn3JxXqnp4>

Why is it that in the United States of America we are not allowed to have intelligent, disparate conversations about the most critical issue of our time?

Why is the public being kept from knowing that there are a variety of expert opinions about how we should respond to the disease named Covid-19?

The take-away: **know that there is not a consensus** and each one of us is called to utilize our own research and critical thinking skills as we make decisions for our own health and policies that affect our community.

Treatments & Risk to Children & healthy people under 65:

There are treatments that have been saving the lives of the small percentage of patients who get critically ill. One treatment that has been used worldwide, but has been widely censored and mischaracterized as "dangerous" in our country is a 5 day treatment of the 60+ year old malaria drug chloroquine/hydroxychloroquine, with zinc and azithromycin.

Dr. Didier Raoult in France was first to publish this in March. American Doctor Zelenko has the #ZelenkoProtocol as follows: 1. Identify patients with a high risk of dying. 2. Treat them within the 5 days of first symptoms. 3. Use a triple drug therapy: Hydroxychloroquine 200mg twice a day for 5 days, Zinc sulfate 220mg once a day for 5 days, Azithromycin 500mg once a day for 5 days. It has become clear when comparing outcomes of patients in countries who have used this treatment with countries who have not that it is indeed saving lives.

Other treatments included High Dose Vitamin C, Vitamin D, and the anti-parasitic drugs Alinea and Ivermectin. <https://c19study.com/>

The vaccine manufacturers (Big Pharma) certainly would not want us to know that there are treatments. If we do not have a continued panic and fear we will not submit to their experimental, highly problematic mRNA vaccines.

There is indeed a consensus that people are indeed being sickened by something. The vast majority of these people have underlying health conditions, and the elderly are especially at risk. We are also well aware that very few children experience these serious symptoms and have close to zero risk of death. Considering the low risk to healthy individuals and children, we must ask why we are choosing to hamper the social/emotional development of children by masking them, separating them, shooting lasers at their heads, traumatizing them with fear and forcing them into a school day not fit for a human child.

*In my view, the anti-human restrictions of anti-social distancing and masking, fear mongering, and cyber school are **tantamount to child abuse.***

Since my family is part of "The Enrichment Cooperative" (TEC) community, we are already equipped to home educate our daughter in the traditional way with books and tactile learning supplies that do not require screens or WiFi. We have

had the great privilege of being able to shield our daughter from this abuse, but are deeply concerned about how this will affect her peers throughout their lives.

Will they all suffer from phobic disorders or post-traumatic stress?

Will they develop empathy and non-verbal communication skills during this critical time in their human development?

As a parent, a resident of Spokane, a human, I charge each one of you with taking responsibility for investigating deeply these potentially unnecessary, inappropriate, intrusive and damaging initiatives in public schools, such as invasive PCR tests, contact tracing, masking, & vaccine promotion or mandates.

Since RT-PCR tests are meaningless from a diagnostic perspective, and can easily manufacture panic simply by increasing the cycles of amplification thereby increasing the positive "cases", we, as thinking people, must ask some deep questions:

*Have we allowed technocratic intrusion into our private lives AND allowed the collapse of our economy AND erosion of our Liberty AND the censorship of experts AND the breakdown of social cohesion AND the mental and physical abuse of children **based on a fraud?***

I encourage each one of you to read and investigate as if your life and the lives of your children actually depend on it, because they do. **This is a call to action.**

Deeply consider the long term implications of your decision making. In my view, the lack of evidence for the necessity and effectiveness of these measures is alarming. Even more alarming is that so many are accepting these irrational measures without questioning them. We must weigh our decisions based on evidence from a broad view including a philosophical view.

What kind of world do we wish to create?

Do we wish to live in a world where an illness with a death rate of .26% causes economic disaster, creates irrational fear of healthy people, and justifies the technocratic surveillance of all people?

Do we wish to create a world where unelected technocrats have the power to tell you when you can leave your house, when you can work, whether or not you can worship in song, or with whom you may socialize?

What is listed above is the world you create if each one of you continues to comply with these entirely unnecessary, invasive, inhumane measures. We must decentralize authority and take back our power as human adults to make our own decisions for our families and our community.

"But we have been following the advice and orders of experts based on science!", you may think. Please, think again.

The "experts" have proven to be corrupt. They cannot be trusted.

The CDC, is an unethical fraudulent agency as detailed by CDC scientist and whistle blower Dr. William Thompson in a heavily censored documentary, Vaxxed.

<https://thehighwire.com/exposed-world-renowned-vaccine-scientists-shocking-legal-deposition-now-public/> | <https://www.youtube.com/watch?v=XIRXxEYnkxA>

Dr. Anthony Fauci, head of the National Institute for Allergy and Infectious Diseases (NAIAD), holder of pharmaceutical patents, set to profit from the covid vaccine, has overseen the increase of allergy and chronic illness in children from 12.8% to 54% during his tenure and is therefore incompetent in the arena of public health policy. He is competent, however, at lining his pockets.

The World Health Organization(WHO) is headed by Tedros Ghebreyesus, a man accused of crimes against humanity and atrocities towards the Ethiopian people.

<https://www.europereloaded.com/is-w-h-o-director-tedros-a-terrorist-global-ties-to-gates-clinton-fdn-fauci-china-genocide/>

The WHO is primarily funded by **the Bill and Melinda Gates Foundation**, who also fund other vaccination and technocratic initiatives such as GAVI, the Quantum Dot Tattoo, worldwide centralized digital ID contact tracing technology, and has roots in eugenic ideology .

It is time to ask who benefits from censoring doctors, investigative journalists and researchers who question this unproven narrative.

For example, these have been censored and slandered:

- America's Frontline Doctors <https://www.americasfrontlinedoctors.com/>
- Great Barrington Declaration <https://gbdeclaration.org/>
- The Highwire <https://thehighwire.com/>

Who benefits from the collapse of our economy, ushering in the "great reset" as designed by globalist, Klaus Schwab?

<https://summit.news/2020/11/16/klaus-schwab-great-reset-will-lead-to-a-fusion-of-our-physical-digital-and-biological-identity/>

Who benefits from overreaching surveillance with contact tracing & ubiquitous 5G?

<https://www.5gcrisis.com/>

Who benefits from coerced (aka forced) vaccination?

<https://www.msn.com/en-us/money/other/ticketmaster-to-require-proof-of-vaccine-or-negative-covid-test/ar-BB1aVnzE>

Who benefits from restricting freedom of travel by creating a vaccination passport?

<https://www.washingtonpost.com/travel/2020/12/08/vaccine-passport-immunity-app-covid/>

Who benefits from the poisoning of the population? with...

radio frequency electromagnetic radiation?

neurotoxic fluoridation?

<http://colleenpalmerconsulting.com/fluoridefree.html>

<https://jamanetwork.com/journals/jamapediatrics/article-abstract/2757544>

toxic vaccines?

<https://thetruthaboutvaccines.com/>

Genetically Modified Food?

Cancer causing Monsanto/Bayer's Glyphosate?

Who benefits from the dissolution of social cohesion due to the unproven idea that healthy people are dangerous?

Humankind certainly does not.

We have an opportunity to attain true health in our community.

The first step is to ignore the charlatans who have been posing as "medical authority". These institutions have overseen arguably the greatest decline in public health in modern history. Why are we still looking to them as an authority?

You will not have to look far to discover that the CDC, WHO, NIH, NAIAD, FDA, Medical Boards, have knowingly promoted or covered up poisoning the population with GMO foods, chemical toxins such as glyphosate, radiofrequency radiation, unsafe vaccines, pharmaceutical drugs and fluoride.

If we truly wish to create a healthy community, all the measures from this point forward that we take to affect public health ***must promote that which helps humanity to thrive.*** There can be no exceptions, no justifications, for public health measures that cause harm.

Distancing causes harm. Masks cause harm. Invasive Testing causes harm. Fear-mongering causes harm. Fluoride causes harm. Vaccines cause harm.

These institutions have caused disease. It is time we reclaim our right to live in a world free from man-made disease. This is a critical moment; a time to attain 20/20 vision at this close of the year 2020. We must act now. Our health, common sense, the purity of scientific exploration, our constitutional and natural rights, our culture, our economic stability, and the spiritual connection of humanity depend on us. Failure to act would be catastrophic.

Life and society, the very essence of what it is to be human, has already been severely damaged and it is up to us to establish the culture we wish for, and live according to the values that we hold dear. **No one else can do this for us, we must take our place of responsibility and behave accordingly.**

I thank you for your deep consideration.

Sincerely,

Colleen Palmer
