

March 12, 2021

Open Letter To:

Dr. David May, Interim President

Dr. Brian Levin-Stankevich, Provost David May, President

Trent Lutey, PhD, Director of Risk Management

The Men and Women on the Risk Management Team

Notice : Vaccine specialist, Geert Vanden Bossche, PhD, DVM - Dire Warning Re: Covid Vaccines!

World renown vaccine specialist, Geert Vanden Bossche, PhD, DVM, gave a groundbreaking interview on March 6th, risking his reputation and his career by bravely speaking out against administration of current Covid19 vaccines. In what may be one of the most pressing topics of our time, the vaccine developer shared his extreme concerns about these vaccines in particular and why we may be on track to creating a global immunity catastrophe.

- Interview on Vejon Health <http://bit.ly/GeertV>
- Halt All Covid-19 Mass Vaccination Immediately (Open Letter to the WHO) — G. Vanden Bossche <https://archive.org/details/halt-all-covid-19-mass-vaccination-immediately-geert-vanden-bossche-ph-d-3-6-2021>

It is of the utmost importance that everyone in the Risk Management team, Trent Lutey, President May, and the Provost read his open letter to the WHO and watch this interview. It is a grave warning about the catastrophe that these vaccines are creating.

President May, as the leader of our 9000+ person community, you are called to share this information immediately with our community and to halt the covid vaccine program at EWU. The current vaccine experiment is causing virulent strains for which the vaccinated will be left entirely defenseless, since the wrong antibodies effectively disable the innate immune response. In light of this dire warning, continuing to encourage our community to enroll their bodies in this potentially disastrous covid vaccine experiment would be criminally negligent.

The EWU Covid response team is ill informed, and is putting our community in grave danger by disseminating false and misleading information. It may be that this is being done unknowingly: as the central authorities dictate, many adult men and women are content to "follow orders", adopting and enforcing those orders without question. These authoritative agencies claim to represent "the science", however with some in-depth reading it becomes clear that this small number of officials are gaming the system by cherry picking shoddy studies and omitting pertinent RCT studies, that if known would halt their harmful recommendations, mandates and profitable experimentation on an uninformed public.

This is a time for the grown men and women in positions of power and influence to do their due diligence. If you adopt and enforce mandates or recommendations, make sure that they are sound. There is no one else who will do this work. As executives, it is your duty and responsibility. The results of your negligence, and that of so many who are just "following orders", will be catastrophic. We not only stand to lose human lives, but also to lose life and culture as we know it due to the technocratic, invasive measures that are creeping into our institutions and culture at large. You have an opportunity to do now, what you were made to do. Be brave, read the scientific literature, study with discernment, seek a multitude of information, and break the chain of command. Getting this right is gravely important, quite possibly the most important thing you will ever do in your life.

“The only thing necessary for the triumph of evil is for good men to do nothing.”

— Edmund Burke

In the 9:01AM Friday, March 12 email from President May the following was stated:

There are new signs of hope each day as vaccines take hold, but there are still many uncertainties ahead of us, and because of this, public health still must be the benchmark that guides our process.

....the reality is that 3,300 students are eligible for graduation this spring - plus alumni who graduated last year and many of our students are still awaiting the COVID vaccination. The health and safety of our students, faculty and staff must be a priority....

These statements underlined above, imply there is scientific evidence to prove that the vaccine is preventing infection or spread. This is false. It also implies that taking this vaccine would benefit the health and safety of individuals and our community at large, although neither is scientifically supported. Stating that students are “awaiting the COVID vaccination” is manipulative and does not reflect the actual risk that every person takes on when they choose to inject an experimental pharmaceutical product. It certainly does not acknowledge the risk benefit analysis, which for the young and healthy clearly points to NOT getting the vaccine. Our community should be informed that these vaccines are not FDA approved, they are only “licensed for emergency use”. Alternately, since there are effective treatments for Covid-19 and the hospitals are not overburdened, there is no emergency. Therefore, there is no justification for our community, the men and women of EWU, to enroll their bodies into this drug trial, which, as more data come in, may prove to leave the vaccinated defenseless against the virulent strains that these Covid vaccines are inducing.

For the vast majority of the population that we serve, covid-19 is not at all dangerous. The recovery rate is 99.8%. It is only for the elderly and those with comorbidities that covid-19 can cause serious illness. For those people who do have underlying health conditions, it is now scientifically proven that there are effective treatments for this disease. Unfortunately, there has been a concerted attack on the dissemination of this fact. One of these treatments is a cheap and brief 6 day protocol of a long proven safe drug, Hydroxychloroquine in combination with Zinc and Azithromycin. Dr. Zelenco, who has clarified the protocol, has had over 1000 high-risk patients with Covid 19 and all have recovered. There are numerous peer reviewed scientific studies that corroborate his results.

<https://c19study.com/> | <https://www.americasfrontlinedoctors.com/>

The Covid vaccines do not stop transmission of Covid-19, nor do they stop infection. Those who are vaccinated can become asymptomatic carriers. It is therefore unacceptably misleading to suggest that becoming part of the Covid vaccine trial will allow our community to “go back to normal”. It is incumbent upon each man and woman who are employed as members of the risk management team to actually read the trials by the vaccine manufacturers. Any time you claim to support “science”, make “recommendations”, or “mandates”, you must read the study and assess its validity. For example, studies of rats have been used to justify mask mandates while randomized controlled studies of humans that showed no benefit of masks have been ignored. Headlines and study synopses do not always include the context from which wise judgement can be ascertained. Unfortunately, not even the press can be bothered to read actual studies.

The Covid vaccines have already killed and permanently harmed people. You can view this data at the Vaccine Adverse Events Reporting System (VAERS) database to see all of the adverse events (29,545) and deaths (1,394) reported that have occurred after covid vaccination <https://wonder.cdc.gov/vaers.html>. Keep in mind as you view this voluntary VAERS database that a Harvard Pilgrim Medical study determined that it captures less than 1% of injuries. The mainstream news and the CDC, both significantly funded by the pharmaceutical industry, are choosing not to openly report or televise the Adverse Events post vaccination.

There are many expert MDs, epidemiologists, and scientists who have been censored. As often as the media told us to “trust the experts”, that same media was censoring, shadow banning, and de-platforming experts who did not agree. There has not been a consensus through the entire "pandemic" that the "public health" measures that have been mandated have been justified scientifically or were necessary. While the fear of Covid-19 was exaggerated, the morbidity vs. recovery data has always had a different story to tell. While we were watching the case-demic, driven by testing healthy people with an inherently flawed PCR test, the most important data - the death rate - was buried and difficult to find, likely because knowledge that the death rate was .26% would have ended the panic, preventing the call for a experimental vaccines, preventing financial ruin from lock-downs, and eliminating the justification for what has become an outright attack on our basic rights: inalienable, constitutional, state and human rights. Human lives are being unnecessarily destroyed by the actions of man which are causing diseases of despair and poverty. Over 50,000 medical practitioners and medical and public health scientists have signed on in support of the Great Barrington Declaration which objects to the "public health measures" that we have been locked into for the past year. <https://gbdeclaration.org/>.

I am holding each one of you personally responsible for verifying the information you disseminate. The lives of 9000+ people are influenced by your remarks. It is your moral duty to do no harm. Encouraging our community to get injected with an experimental product is reckless and it must be stopped. Furthermore, continuing to add fuel to Covid-19 panic is inappropriate. There are many experts who are encouraging that we go back to normal now, with no mandates or "public health" measures. I encourage you to seek a balance of experts from various fields of study, not just the ones who happen to have the biggest soap box because it has been built by pharmaceutical dollars, this includes politicians on the payroll.

The way that we get "back to normal" is by seeking and disseminating the truth.

- Covid 19 is not a dangerous disease for those under 65 with no comorbidities.
- There are treatments for those who are not healthy or are elderly.
- We have lost many of our elders because of medical error, malpractice, and censorship of appropriate and effective treatments.
- Zinc and Quercetin or Zinc and Hydroxychloroquine can be used prophylactically.
- Vitamin D levels matter for disease prevention.
- Nourishing food free from toxic chemicals such as glyphosate matters for disease prevention.
- Exposure to the newly deployed 5G, and the general proliferation of wireless radiation is damaging to health. 5G is correlated with Covid-19 disease.
<https://drtomcowan.com/> | <https://www.westonaprice.org/health-topics/is-coronavirus-contagious/>
- Exposure to air pollution containing glyphosate from biofuels is correlated with Covid-19 disease.
<https://stephanieseneff.net/glyphosate-covid-19-connection/>
- Masks are ineffective at preventing respiratory illness, but are very effective at causing depression and eroding our culture. Cloth masks harbor bacteria.
https://wwwnc.cdc.gov/eid/article/26/5/19-0994_article
- The Covid Vaccine does not prevent disease or the spread of Sars-Cov2, and the effectiveness is only defined to lessen symptoms.

The way that we get "back to normal" is by reclaiming our dominion on our planet by behaving like sovereign human beings.

All of the measures, such as lock-downs, mandatory masking, mandatory testing, and vaccine coercion is in violation of our inalienable rights. No one can take these rights away from us, it is simply not in their, or your, jurisdiction to do this. As adult men and women, we are responsible for ourselves, and for our own health.

Never before have healthy people been prevented from engaging in what, for all of time, was considered normal behavior, such as breathing the air and walking freely in public spaces. The idea that Healthy People are a danger to anyone is perhaps the most damaging lie being disseminated during the "pandemic".

Forced Medical Experimentation?

In Israel 5 million people out of the total population of 9 million have already been injected with the experimental Pfizer Covid Vaccines, and the entire country is being forced to participate. Evidently the Nuremberg Code of Ethics is no longer relevant? Half of the worldwide Jewish population lives in Israel. I shudder when I consider the possibility that the entire nation of Jewish men and women, established after the Holocaust and WW2, may be catastrophically harmed, potentially killed, by this forced medical experiment. In the United States about 20% of our population has enrolled their bodies in this pharmaceutical experiment. We must take a step back and consider what we are doing to ourselves. The Pfizer and Moderna vaccines are both using a mRNA technology that has NEVER BEFORE been used on humans, and no covid vaccine has undergone the lengthy 5 - 10 year study that is required for proper safety study and ultimately FDA approval. Some MDs have stated that technically, the mRNA technology is not a vaccine but an immune therapy since it makes the host cells produce a spike protein which then the body mounts an attack against.

Is it not naive and short sighted to allow and encourage human experimentation on a massive scale?

Does it not expose us to unfathomable risk? It is as if we are under some kind of spell, and the spell is designed for our demise. Do we not realize that the same industry that killed hundreds of thousands with FDA approved Vioxx, or caused countless cancers with Johnson & Johnson baby powder is the very same industry that makes vaccines? Do we not know that the vaccine makers are exempted by law from liability if their vaccine harms or kills us? Do we not know that this experimentation is being done without proper oversight by the Center for Disease Control as they do not have a comprehensive tracking system for adverse events such as reactions and death? The lack of infrastructure to monitor the health outcomes of the men and women in this massive experiment is deeply alarming and entirely unacceptable. The CDC, a government agency meant to serve the men, women and children in our country is failing miserably.

For those who have already entered the covid vaccine drug trial, getting zinc into your cells may help prevent RNA viral replication: look up "Quercetin" "Hydroxychloroquine" "Ionophore" for more information on Mercola.com. Detoxification, reducing wireless exposure, proper rest and a clean diet are all important in cultivating health. Most importantly, cultivate your spiritual connection. We, as a people, have put our faith in idols. Contrary to the popular phrase on yard signs which state "Science is Real", "Science" is not pure or real when it is corrupted and utilized to mislead trusting people, or when it only looks at a small piece of the puzzle and denies that the rest of the puzzle exists. It is inappropriate to deify "science", it sets us up for being duped.

Dr. David May, Dr. Brian Levin-Stankevich, Dr. Trent Lutey, if you truly care about human life, you will immediately share the dire warning offered by Geert Vanden Bossche, PhD, DVM, and direct our community to read his letter to the WHO and watch the interview. Up until now, you have been promoting vaccines, and given our community the impression that vaccination would be beneficial, omitting mention of risks. If you choose not to share this new, expert information offered by a world recognized vaccine scientist, and people in our community remain unaware of the alarming risks to these experimental vaccines, you will be held responsible for withholding this pertinent information. You have disseminated false information and it is harming the men and women in our community. This is your opportunity to make it right.

Furthermore, in my view, it is time to shift our focus toward encouraging the bolstering of the immune systems, and general health of the men and women in our community. Here are a few ideas:

- Instead of wasting money with unconstitutional mandatory testing for Covid, I would suggest that you offer free Vitamin D level tests
- Offer Zinc, Vitamin D, C, and Quercetin supplements to those who want it
- Employ Tele-medicine primary care MD, RN, and Naturopaths who can offer confidential medical advice 24/7 and prescriptions at the onset of symptoms of disease for anyone in our community. The evidence shows that early treatment for Covid-19 is important for recovery, but if you talk to someone who has tested positive and recovered from Covid-19, you will quickly learn that very few were given any medical treatment at all!
- Improve the quality of the food in our dining halls. Ban foods that contain glyphosate (Round-up) and GMO foods such as soybean oil and corn.
- Turn off WiFi at night campus-wide and provide wired internet connection to all residences and offices. Encourage the community to place cell phones on Airplane Mode while in crowded spaces, and when not in use. The radiation levels in group settings or stadiums negatively affects health and the toxic exposure can cause flu-like illness. <https://ehtrust.org/> | <https://www.cellphonetaskforce.org/>
- Keep cell towers and 5G away from living facilities. <https://spokanewired.org/noticeofalert.html>
- Share the truth about masks, that in RCT studies, they didn't work to prevent respiratory illness. https://wwwnc.cdc.gov/eid/article/26/5/19-0994_article
- Encourage people to behave like content healthy humans have behaved for all of time: spending time in close proximity to one another, smiling, laughing, dancing, singing, playing sports and hugging. The despair and fear have paralyzed our students. We are on the brink of a mental health crisis, and all we have to do to solve it is to behave like humans again. If we continue to behave as though other healthy people are dangerous, we will be forever lost in our own insanity.

We create the world we want to live in. We are victors, not victims. We are responsible. We are free. We are sovereign. The planet belongs to us. It is time we reclaim our place on the planet and in doing so reclaim our sanity.

I will be posting this letter publically and sharing it with my colleagues and students. **Everyone in Earth should hear and read the words of Geert Vanden Bossche, PhD, DVM. The very survival of our species may depend on it.**

I expect and trust that you all have what it takes to do the right thing.
Govern yourselves accordingly.

Sincerely,

Colleen Palmer
Adjunct Voice Instructor, Music Department, EWU
Certified Health Coach

P.S. Letters from the President have made unscientific and misleading statements to our community: 3/12/21 “*There are new signs of hope each day as vaccines take hold*”, 2/18/21 “*With COVID numbers declining and the vaccine slowly taking hold*”. Additionally, the “Coronavirus Town Hall” was so careless and misleading that with more time I could take it apart bit by bit, but doing so would distract from the task at hand, and may not be helpful. I charge all of you to dig deep, be honest, only make statements that are verifiable. Do not quote the CDC or Washington Department of Health any longer. They lie. You are responsible for what you put on the website and in letters, and for the information you link our community to. If you link to it, it is an endorsement. Good people like you are not asking questions, nor are you looking at the science and thinking critically.

Below is a screen capture of misinformation being disseminated by EWU. When it comes to scientific intervention, the onus is on the medical professional or administrator to offer informed consent. In this ROTC picture I do not see the patient being offered informed consent about their medical risk taking. Are the vaccine manufacturer’s package inserts being provided to the patient to review so they are aware of all potential adverse events and reactions that were encountered in the trial thus far? Are the patients aware that the vaccines are not approved, but are “authorized for emergency use”? Are the patients made aware of the VAERS database where they could review reported adverse events, and report an adverse event if they have one? If the patient has not been given informed consent to medical risk taking, those who administer, promote or mandate a medical intervention are in violation of the patient’s human rights. Omission is guilt.

Statements like “*The vaccination effort is an important step to getting life back to normal*”, as seen below, should have scientific evidence to support that claim. I claim that the statement is false. Without the scientific citing, we may be in danger of endorsing a Religious ritual, not a scientific medical procedure. This is extremely careless and is an endemic problem in society right now. It has only become acceptable because people are in a state of fear and not thinking straight. At EWU, we should hold ourselves to a higher standard, we should be the leaders and the innovators. The Department of Health and CDC may be bought (their websites look like a vaccine advertisement), but EWU should be capable of discernment and integrity. Omission is guilt. We must do better.

The screenshot shows a web browser window with the URL <https://inside.ewu.edu/news/featured/ewu-rotc-cadets-administer>. The page header reads "Inside EWU" with navigation links for "A-Z Services", "STUDENTS", "FACULTY/ADVISORS", "EMPLOYEES", and "MY". The main text of the article includes the following quotes and information:

“So many of the people I have personally vaccinated are happy that there is hope in the foreseeable future in regard to getting back to pre-pandemic life. They have all been very grateful,” says Knight. “So many people have been negatively affected by the virus and this vaccine will likely give us a chance at getting back to the things we miss doing.”

One of Baker’s favorite moments so far involves a man who got on the schedule last minute. She says he was so grateful and excited, he asked for a picture to share and remember the milestone.

“This was a memorable experience, and I’m grateful that I was there to be a part of it while also making this a positive experience for this gentleman,” Baker adds. “I was able to make his day, and his enthusiasm and demeanor made my day.”

These cadets and many others are thankful to be able to help with the vaccination effort. Baker and Knight know the experience will be valuable as they prepare to enter the nursing profession.

“As a nurse we have to care for those who are often in a vulnerable position in relation to health,” says Knight. “It is extremely important to make people feel comfortable and safe in these situations and the best way to do that is through interaction and establishing rapport.”

Knight also hopes the community continues to seek education on COVID-19 and more specially vaccines. The vaccination effort is an important step to getting life back to normal. Please use the links below to find reliable sources to get information and make informed decisions so that these cadets can continue to make an impact.
